Vol. 147

WASHINGTON, THURSDAY, NOVEMBER 15, 2001

No. 158

## *House of Representatives*

REGARDING NOBEL LAUREATE DR.  
LEE HARTWELL

**HON. DOC HASTINGS**

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

*Friday, November 16, 2001*

Mr. HASTINGS of Washington. Mr. Speaker, I rise today to recognize and honor Dr. Lee Hartwell, the 2001 Nobel Prize winner in the field of medicine.

Each year the Nobel Prize for Medicine is awarded to those who have made important discoveries within the domain of physiology or medicine with the greatest benefit on mankind. I would like to take this opportunity to congratulate the 2001 award winner Dr. Lee Hartwell, President and Director of the Fred Hutchinson Cancer Research Center located in Washington state. I'm proud that innovative research, like that done by Dr. Hartwell, is being conducted in my home state.

Dr. Lee Hartwell, a pioneering geneticist, was awarded the Nobel Prize for Medicine for his discoveries concerning control of the cell cycle. For three decades Dr. Hartwell has conducted research on cell division and has identified molecules that regulate cell division. It's this kind of knowledge that is key to understanding how cancer cells mutate and developing approaches to reverse or prevent that mutation.

With an estimated 24,800 new cancer cases in Washington state alone this year, it's clear that many people will benefit from the hard-work and commitment of Dr. Hartwell.

Thank you for this opportunity to recognize Dr. Hartwell. His discoveries have tremendous implications for life saving cancer therapies and will have an impact on cancer patients and their families for generations to come.
