How to Connect to Fred Using a PC

1. Double Click on the 'My Computer' icon on your desktop
2. Select 'Tools', then 'Map Network Drive'
3. Choose a drive letter that is not currently mapped
4. Enter: \\fred\home

The PC will access Fred using the username and password you used to log-in to the PC. If you wish to access a Fred account different than the one used to log into the computer, click on *connect using a different user name* in the Map Network drive window.

NOTE: do not continue to use //srfilе/username or //srfilе/home, this path naming convention is no longer supported.

Contact Support Information

You may contact Research Computing Support at 206-667-6719 or rcs@fhcrc.org if you require additional assistance.
